PROJECT

Real Estate Web App, Link

- Developed a full-stack real estate web application using React.js, Node.js, Express, and MongoDB.
- Implemented user authentication system allowing users to sign up and log in securely using email and password.
- Integrated third-party authentication system, enabling users to log in with Google accounts for enhanced convenience.
- Designed a user-friendly interface where users can browse and view properties with ease.
- Implemented advanced filtering options to help users refine their property search based on criteria such as location, price range, amenities, and more.

Restaurant Web App, Link

- Developed a dynamic web application using Node.js, Express, MongoDB, EJS, and Bootstrap.
- Implemented functionalities allowing users to place orders, delete orders, and book tables seamlessly.
- Integrated MongoDB as the backend database to store and manage restaurant data efficiently.
- Designed a user-friendly interface with Bootstrap for enhanced user experience and responsiveness across devices.
